Monthly Meeting with the Director of Health on the 30th January 1930

Arrival of Sanitary Engineer and question of his Budget

3/ A provisional Budget for Rs. 13,965/- for the second half of the current official year has been sanctioned in Government Order No. G. 7367-81/Sanv. 31-29-9 dated the 18th December 1929. In regard to other matters, the arrival of the Sanitary Engineer is awaited.

Sub

Sl. 191 From the Director of Health
No. C 426-10/Mis 21-29-HS 25-3-30

State that a sum of Rs 23,015 should be provided in the budget for the Bureau of Sanitary Engineering during the next year by Govt. In para 4 of the Govt no G. 7367-81 Fam. 31-29-9 S. 18-12-1929, the Director of Public Health was requested to submit detailed budget estimates of the Bureau of Sanitary Engineering. The Director has now principally asked for a lump sum grant of Rs 23,015 consisting of the following items:-

1. According to agreement with the Rockefeller Foundation — Rs 6,000
2. Under appropriation on the budget for 1929-30 as per agreement of 6-12-29. — 3575
3. Under appropriation for permanent Equipment — 1,500

23,015

SIR,

Adverting to Government Order No. G. 7367-81/Sany. 31-29-9 dated 18th December 1929, I have the honour to state that in para 7 thereof, I have been directed to submit in consultation with Dr. Sweet, proposals for the equipment of the office of the Sanitary Engineer and for the provision of transportation facilities for him &c.,

I consulted Dr. Sweet and we considered that these matters may lie over till the arrival of the Engineer in Bangalore, not knowing the details of the Engineer's actual requirements, regarding number and type of pieces of furniture and other equipment required and the make and model of the Car he would prefer

I may however mention that furniture and office equipment for the Engineer and his staff may cost about Rs. 800/- and the Car about Rs. 4,500/-.

I have the honour to be

Sir,

Your most obedient servant

GENERAL MISCL. 5945. 27 MAR

Sans 31-29-19

FROM

J. V. KARVE, Esq., M.B., ch.B., (Edin.), D.P.H., (LONDON),
Director of Health with the Government of His Highness the Maharaja of Mysore,
Bangalore.

To

R. Ranga Rao, Esq., B.A., B.L.,
General Secretary
to the Government of Mysore,
Bangalore.

SIR,

Your No. G. 11408/San. 31-29-10, dated Bangalore, 22nd March 1930, in regard to the budget for the Bureau of Sanitary Engineering. With reference to the above I have the honour to state that I have consulted the Sanitary Engineer in the matter and I find that it is not possible to draw up a budget for the financial year 1930-31 until the question of just what staff and budget is to be transferred from the Public Works Department to the Department of Health is settled. This question is now being considered and definite proposals will be submitted as soon as an agreement is reached. In the meantime I would suggest that a lumpsum for this Bureau be included in next year's budget.

Upon consultation with Dr. Sweet I find that Government should budget next year as follows for the Bureau of Sanitary Engineering, in addition to any budget transferred from Public Works Department.

(1)	According to agreement with Rockefeller Foundation.	Rs 18,000
(2)	Under appropriation on 1929-30 budget as per agreement and Government Order No. G. 7367-81/Sany dt 18/12.29.	3,515
	Under appropriation for permanent equipment as per above order.	1,500
		Rs 23,015

His Highness should be allowed at the rate of month/month

Dr. Sweet tells me that unless Government lists this entire amount Rs 23,015/-,as a lumpsum grant for 1930-31, it can not expect the Rockefeller Foundation to contribute its promised portions.

I have the honour to be,
Sir,
Your most obedient servant,

Director of Health.

WD068—GPB—20,000—1-8-29

Dr Sweet's letter to the Govt
Secy: dt 21.2.1929 in which
of which Dr Sweet proposed a
schedule of expenditure from 1929-30
to 1933-34 under this schedule
Govt had to provide during
1929-30 Rs 12,250 (including Rs 10,000
for permanent equipment)
& 1930-31 6,750 (excluding fellowships)

both on behalf of the Foundation & of the Imperial Govt.

The arrangement proposed by him
was approved in Mr Ranga Rao's D.O.
letter No: G. 13818 dt 13.5.1929,
the rest of the expenditure each
year being provided by the
Foundation, according to the
following schedule:-
For Final year 1930 13,500
" 1931 .... 7,000 & so on.

According to this agreement, ____ of during
Govt already provided for Rs
13,985 (including Rs 8,500 for equipment)
which is more than Rs 1,500 stipulated
by Dr Sweet. Hence, it is not clear
why another sum of Rs 3,515 (item 2)
has to be included in the next year's
budget for so called "under appropriation".
It is not also understood why
Rs 18,000 shd be provided (item 1)
in the next budget, while the
agreement required a provision of only
Rs 6,750. An early reply is required,
~~No. 8000 is to be~~

Y S

Chief Secy

D.O. No. T. 367

21-4-30

Office of the Consultant in Health with the Government of Mysore.

Bangalore, dated, 21st. April 1930.

Dear Sir.

Your D.O. No. G. 102497 dated 19th April to the Director of Health has been referred to me for reply. It seems necessary first to make certain general observations in regard to the Sanitary Engineering budget. In accordance with the arrangement made for the Malaria Stations and the Rural Health Unit it was understood that Government would bear the entire cost of the Sanitary Engineering budget, the amount due from the Rockefeller Foundation to be refunded to Government at the end of the year when proper accounts were submitted. Seeing that this has already been the arrangement, no other arrangement was made for the Sanitary Engineer and Government consequently is expected to budget the total amount for the whole work. Another difficulty is that the Rockefeller Foundation runs its financial year according to the calendar year, while Government has its financial year from July to June. It was due to this that there was some confusion in the amounts mentioned in my letter of February 21st, to the General Secretary to Government. In order to arrive at the amounts due from the Rockefeller Foundation for the Government financial year it is necessary to take half the amount given in that letter as due from the Rockefeller Foundation for the calendar year and add it to half of the amount for the preceeding year. This is somewhat

complicated, but it was necessary since the accounting system of the two parties did not agree.

In the financial year 1929-30 the proposals contemplated the expenditure of a sum of Rs 9,000/- plus an extra sum of Rs 10,000/- for permanent equipment. The Rs 10,000/- was to come entirely from Government, but the Rs 9,000/- was to be divided between Government and the Foundation. In accordance with the arrangement mentioned above, Government's budgetted amount should have been Rs 19,000/-. At the end of the period Government could expect a sum of Rs 6,750/- refund from the Rockefeller Foundation as its share of the Rs 9,000/-. Government sanctioned a sum of Rs 13,985/- which included Rs 8,500/- for equipment. There was consequently in this budget a deficit in the promised amount for equipment (Rs 10,000/-) of Rs 1,500/-. There was also a deficit in the Rs 9,000/- of Rs 3,515/-. It was for this reason that I asked Government to include in next year's budget an extra amount of Rs 1,500 for permanent equipment, (in order to bring up the budgetted amount to Government's promise of Rs 10,000/-), and another sum of Rs 3,515/- to bring up the recurring expenditure to Rs 9,000/-. In July as soon as accounts are submitted, Government might have expected from the Rockefeller Foundation Rs 6,750/- had it spent the total Rs 9,000/-. Since it has not expected to spend this amount it can ask the Foundation only for 75% of whatever the expenditure may be, excluding the Rs 10,000/- for permanent equipment which was to be borne entirely by Government. If Government will spend this extra Rs 3,515/- before January 1931, it can expect the Foundation to refund its total promise of Rs 6,750/-.

In regard to your next question as to why Rs 18,000/- should be provided for 1930-31, I think the first paragraph of this letter explains. Government is to budget the total amount and recover the promised amount from the Rockefeller Foundation at the end of the year when accounts are submitted.

I notice that in your letter you state that during 1930-31 Government is to provide Rs 6,750/- excluding fellowships. The two promised Sanitary Engineering fellowships have been deferred to 1931-32 and 1932-33 as you will see by reference to Government Order No. G. 7033-5/ Sany. 53-29-2 dated the 7th December, 1929.

Yours sincerely,

W. C. Sweet,
Consultant in Health.

Bureau of Sanitary Engineering of the Health Department.

Passes orders *re* Establishment, Budget and duties of the —

READ—

Paragraph 8 of the Government Order No. G. 7367-87—Sany. 31-29-9, dated the 18th December 1929, sanctioning a provisional budget for the Bureau of Sanitary Engineering and reserving for consideration the question of the staff to be transferred from the Public Works Department to the Bureau of Sanitary Engineering.

2. Letter No. G. 424-12—Mis. 21-29-13, dated the 1st April 1930, from the Director of Health in Mysore, forwarding a copy of letter dated the 25th March 1930, from Mr. Mieldazis, Sanitary Engineer deputed from the Rockefeller Foundation, in the matter of the activities to be entrusted to the Bureau of Sanitary Engineering and the staff required therefor.

3. Further note dated the 7th May 1930, by Dr. W. C. Sweet giving a revised scale of establishment and recurring charges required for the Bureau and the amount of contribution that may be expected from the Foundation for a period of four years.

ORDER NO. G. 14053-108—SANY. 31-29-29, DATED 31ST MAY 1930.

The papers read above deal with the following details connected with the Bureau of Sanitary Engineering:—

(1) The duties to be entrusted to the Bureau;
(2) The staff to be transferred to the Bureau from the Public Works Department;
(3) The new staff to be employed in the Bureau and the budget provision required for the purpose.

2. *Duties of the Bureau.*—Government agree with the proposals of Mr. Mieldazis, generally concurred in by the Chief Engineer and direct that the Bureau of Sanitary Engineering be entrusted with the following duties:—

(i) The planning and designing of all new works of Water Supply and drainage, including under the latter all schemes for the treatment and disposal of sewage and trade waste.
(ii) The inspection, supervision and alteration of all existing works of the character above described, including the planning of more efficient methods of purifying existing supplies of water.
(iii) All engineering aspects of Malaria and Plague, involving the design of drainage projects for the control of Malaria and the design of rat-proof construction for the control of Plague.
(iv) The approval of all plans.
(*a*) For town planning improvements or extensions;
(*b*) For the sanitation, ventilation and lighting of schools, jails and other public buildings;
(*c*) For works of irrigation so far as they might affect the health of the community.
(v) The investigation and supervision of all water sheds supplying water used for demestic purposes.
(vi) The collection of water samples from public and private water systems for bacteriological examinations for contamination injurious to public health.

3. *Staff and Budget to be transferred from the Public Works Department.*—Mr. Mieldazis suggests that the marginally noted personnel of the Sanitary and Town Planning Division of the Public Works Department with the relative budget provision, may be transferred to the Bureau of Sanitary Engineering. The Chief Engineer, to whom the matter was referred, is of opinion that the work of the Water Supply Division is chiefly of an administrative character and that there is no necessity to place it under the Sanitary Engineer of the Health Department. He has, however, no objection to the Sanitary Engineer

1. Executive Engineer,
1. Assistant Engineer (Water Supply Section).
1. Sub-Engineer, (Sanitary Section).
2. Sub-Overseers (Water Supply Section).
4. Sub-Overseers (Sanitary Section).
2. Draftsmen (Water Supply Section).
1. Tracer (Town Planning Section).
1. Typist Clerk (Office Establishment).
2. Clerks (Office Establishment).

inspecting the work of the Water Supply Division periodically and forwarding proposals for improvements, if any, to the Chief Engineer. In regard to the Sanitary and Town Planning Division, he is agreeable to the officer in charge of it working directly under the orders of the Sanitary Engineer in the matter of designs for water supply, drainage and town planning schemes and submitting them through him to the Chief Engineer for further action.

4. On a consideration of these views, Government have come to the conclusion that the Water Supply Division might remain as at present as part of the Public Works Department but that the Sanitary and Town Planning Division with its present staff (excluding works establishment) might be placed under the immediate control of the Department of Health. This Division will be relieved of the actual execution of Sanitary Works, which will be left to the local bodies concerned or the Public Works Department, as the case may be. The Chief Engineer, in consultation with Mr. Mieldazis, is accordingly requested to intimate to the Comptroller, the details of staff and budget provision to be transferred to the Bureau of Sanitary Engineering.

5. *New Staff and Budget of the Bureau for 1930-31.*—Dr. Sweet has forwarded a memorandum which is annexed to this order, giving details of the expenditure required for carrying on the work of the Bureau during the next four years and the apportionment of cost between the Government and the Rockefeller Foundation. According to these proposals, with which Government are in general agreement, a sum of Rs. 18,000 has to be provided annually towards the budget of the Sanitary Engineering Bureau, in addition to the staff and budget of the Sanitary and Town Planning Division of the Public Works Department referred to in the above paragraph. Government are pleased to sanction the following scale of expenditure for the year 1930-31, subject to reconsideration, if necessary, in connection with fixing the budget of the Health Department as a whole:—

					Rs.
1	Assistant Engineer	..	..	200	2,400
2	Draftsmen	...	..	..	1,400
1	Stenographer	..	..	..	640
6	Peons	..	..	72	864
1	Chauffeur	..	..	35	420
Expenses of lorry		..	..		1,800
Temporary survey coolies		...	..		3,000
Travelling allowances		..	..		3,500
Experimental Fund		...	..		2,700
Contingencies		...	...		1,276
			Total	..	18,000
Permanent equipment		..	..		1,500

The contribution of the Rockefeller Foundation which is estimated at Rs. 13,500 for the year 1930, may be shown as a deduct entry under this head.

6. *Miscellaneous.*—Dr. Sweet has also proposed the purchase of a motor lorry at a cost not exceeding Rs. 3,000 and the appointment of a Chauffeur therefor. This proposal is sanctioned on the understanding that the cost will be met during the current year from the unexpended balance out of the provision of Rs. 13,985 made in the Government Order No. G. 7367-8—Sany. 31-29-9, dated the 18th December 1929.

7. The Comptroller is requested to keep separate accounts for each calendar year commencing from the 1st January 1930 on account of the expenditure on the Bureau of Sanitary Engineering, to enable the Rockefeller Foundation to assess their contribution due to Government.

G. O. No. G. 7367-81—Sany. 31-29-9, dated 18th December 1929.

Bureau of Sanitary Engineering.

Passes orders about the formation of the —— in the Health Department.

READ—

Correspondence ending with letter No. T. 70, dated the 21st August 1929, from Dr. W. C. Sweet, forwarding a copy of letter from Dr. V. G. Heiser and the minutes of the Meeting of the Scientific Directors held on the 10th July 1929 dealing among other matters with the question of the Bureau of Sanitary Engineering proposed to be established in connection with the comprehensive scheme of health work in the State.

2. Letter dated the 28th September 1929, from the same officer, forwarding a draft budget for the Bureau of Sanitary Engineering from 1st January to 30th June 1930.

3. Para 5 of Government Order No. G. 6680-730—San. 55-27-34, dated 28th November 1929, sanctioning the reorganization of the Health Department about the formation of the Bureau of Sanitary Engineering.

ORDER No. G. 7367-81—SANY. 31-29-9, DATED 18TH DECEMBER 1929.

The question of starting a Bureau of Sanitary Engineering of the Department of Health has been under the consideration of Government since January 1929. In February 1929, Dr. Sweet forwarded a scheme in the matter, the main features of which were—

(*a*) transfer of all staffs, work and budget of the Sanitary, Town Planning and Water Supply Divisions of the Public Works Department to the new Bureau of Sanitary Engineering of the Department of Health,

(*b*) provision of two fellowships in Sanitary Engineering during the years 1931 and 1932,

(*c*) eventual annual provision of a sum of Rs. 30,000 for the Bureau of Sanitary Engineering in addition to the budgets to be transferred from the Public Works Department, and

(*d*) provision of a sum of Rs. 10,000 during the 1st year for the purchase of permanent equipment.

2. He has also reported that in the event of Government agreeing to the above arrangements, the Rockefeller Foundation would be prepared—

(1) to lend the services of a Sanitary Engineer from about the 1st of January 1930 to 31st Decemcer 1933, and

(2) to contribute Rs. 27,000 to the additional budget of the Bureau of Sanitary Engineering for the years 1929-30, 1930-31 and 1931-32 as detailed in the margin.

1930	...	13,500
1931	...	9,000
1932	...	4,500

3. Government are in general agreement with the scheme outlined above. The need for a Bureau of Sanitary Engineering has already been recognized in the Government Order dated the 28th November 1929 sanctioning the reorganization of the Health Department and the details of work to be assigned to it have also been specified therein. It is proposed to place this Bureau in charge of the Sanitary Engineer, whose services the Rockefeller Foundation have kindly promised to place at the disposal of Government for a time. It is reported that the Rockefeller Foundation have already assigned Mr. Mieldazis for work in Mysore and that he is expected to arrive on or about the 1st January 1930. He will be given the status of a Head of Department. Separate action is being taken for providing suitable accommodation for him (with telephone facilities)

4. Dr. Sweet has proposed a budget for the necessary staff including therein two Assistant Engineers and two Draughtsmen for the Sanitary Engineer and providing for an expenditure of Rs. 19,000 during the next half-year. Government consider that it is not immediately necessary to entertain two Assistant Engineers and two Draftsmen and that it would be sufficient if one Assistant Engineer and one Draftsman are entertained. They are accordingly pleased to approve of the following provisional budget of the Bureau of Sanitary Engineering for the second half of the current official year.

	Per month.	*Total per month.*	*Total per 5 months.*
1. *Establishment.*	Rs.	Rs.	
(*a*) *Salaries.*—			
One Assistant Sanitary Engineer Rs. 200—2-250-25-450 ..	200	200	
(*b*) *Staff.*—			
One Draftsman 55—5—80 ..	55	55	
One Steno grapher 50—3—65 ..	50	50	
Six Peons	12 each	72	
	Total ..	377	Rs. 1,885
2. Temporary Survey coolies ..	..		2,000
3. Travelling allowance (for 5 months) ..	..		1,000
4. Contingencies ..	..		600
5. Permanent equipment including a motor car for the Sanitary Engineer			8,500
		Total	13,985

5. As there is no source in the sanctioned budget to meet this additional charge, a demand to that extent will be placed before the next meeting of the Legislative Council. As against this expenditure, a contribution of Rs. 10,000 on account of Malaria and Rural Health Units is due during the current year from the Rockefeller Foundation according to the agreement with them. In the result, the final expenditure that would be actually chargeable to the Public Health Department Budget would be only Rs. 3,985.

6. The Comptroller is requested to keep separate accounts of the expenditure incurred on the Sanitary Engineering branch of Public Health Department in order to enable the Government to supply the Rockefeller Foundation with all the particulars that they may require.

7. The Director of Health is requested to forward in consultation with Dr. Sweet proposals for the equipment of the office of the Sanitary Engineer and the provision of transportation facilities to him as also any other matter incidental to the starting of the work of the Bureau of Sanitary Engineering.

8. The question of the staff to be transferred from the Public Works Department to the Bureau of Sanitary Engineering may be settled after the arrival of the Sanitary Engineer. The Director of Health is requested to submit in consultation with Dr. Sweet and Mr. Mieldazis detailed budget estimates of the Bureau of Sanitary Engineering, before the end of February 1930.

9. Government desire to convey their thanks to the Rockefeller Foundation for generously lending the services of a Sanitary Engineer.

R. RANGA RAO,
General Secretary to Government.

To—Dr. W. C. Sweet.
The Rockefeller Foundation, through Dr. Sweet.
The Director of Health.
The Chief Engineer of Mysore.
The Deputy Commissioners of Districts.
The Comptroller to Government, through the Financial Secretariat.
PRESS TABLE.

Exd.—P. S. R. N.

Subjects proposed to be brought up for discussion at the meeting of the Dewan and Member of Council on the 23rd April 1930.

1. The Sanitary Engineer's Budget. Certain proposals have been already submitted to Government. Vide this office No. 424-12/Mis. 21-29-13 dated 1st April 1930.

Sam 31 of 29 put up;
